### **DETAILED ACTION**

## Reissue Applications

1. Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,643,641 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely appraise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

2. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

Since there is a change of assignment, a new written consent and 3.73 (b) statement needed.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 (b) is required in reply to this Office action.

Art Unit: 2162

3. This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

- (a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or
- (b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

- 4. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: Since there is a change of assignment, a new written consent and 3.73 (b) statement needed.
- 5. Claims 104 110 are rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application made and sworn to by the assignee and not the patentee. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed

Application/Control Number: 10/616,602

Art Unit: 2162

the original patent. A claim is broadened if it is broader <u>in any one respect</u> even though it may be narrower in other respects.

- 6. The reissue is a broadening reissue because it includes subject matter not covered by the patent claims (the subject matter of Figure 3 set forth in new claims 104 110.
- 7. The broadening does not appear to recapture surrendered subject matter because the new claims seem directed to an overlooked aspect of the invention.

#### Oath/Declaration

8. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error, which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

The reissue oath/declaration filed with this application is defective because it does not adequately identify at least one error as per 37 CFR 1.175(a)(1).

Stating that one filed a broadening reissue because "the full breadth of available claims was not captured in U.S. Patent No. 6,032,156", without identifying the specific feature is not adequate. ("Rather, the oath/declaration must specifically identify an error").

The reissue oath/declaration, dated July 10, 2003, was found to be defective for failing to identify a specific error according to 37 C.F.R. 1.175(a)(1). Applicant submitted a supplemental oath/declaration, dated July 27, 2006, which

Application/Control Number: 10/616,602

Art Unit: 2162

points out that the "material of the invention defined by Figure 3 and set forth in claims 104 - 110 was not previously covered adequately".

Since the changes to claim 104 are more than mere spelling, grammar, typographical, editorial, or clerical errors, a supplemental oath/declaration is needed for the changes.

# Claim Rejections - 35 USC § 251

9. Claims 104 – 110 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Art Unit: 2162

### Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahid Al Alam whose telephone number is (571) 272-4030. The examiner can normally be reached on Monday-Thursday 8:00 A.M.- 4:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on (571) 272-4107. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
